

PRODUCT DESCRIPTION

Sauna POD is a beautiful solution for the gardens with the "soft edges". It looks nice and is different from the popular sauna cabins or sauna barrels. It can also be built next to the Camping POD and make your camping place look smooth and cozy. Sauna POD is divided into two zones: a relaxing room and a sauna room. In the relaxing room, you can not only cool down after the bathing but also put some things there and change.

Sauna Pod is made from spruce wood. Upon the customer's request, we can install a wood-fired furnace or an electric heater in the sauna. The thickness of the Sauna pod walls is 38 mm; the thickness of the solid wood flooring is 28 mm. A roof is covered with bitumen shingles of selected color: black, red, or green. Sauna Pod is 4 m long and 2.4 m wide. Overall height including the roof is 2.58 m.

Sauna room volume: 12 m3.

SPECIFICATION

People	2-4 persons
Timber	Spruce / Thermowood
Shape	Pod
Room	2
Inside area	9.6 m ²
Total height	2585 mm
Floor thickness	28 mm
Roof thickness	38 mm
Wall thickness	38 mm
External dimension	2400 x 4000 mm
Door size	1020 x 1900 mm
Interior tinted glass door	698 x 1855 mm
Window size	220 x 660 mm

STANDARD SET

Pod made from spruce;
Roof covered with bitumen shingles of your selected color;

COLOR CARD

EXTERIOR WOOD STAIN COLORS

Water-based, quick drying premium total protection for wood outside. Thin layer varnish – 3 in 1: impregnation, primer, and varnish!

PLEASE NOTE: The colors shown in the catalogue and website may not 100% match the color you will receive. The color of the wood material affects the final color.

COLOR CARD

EXTERIOR WOOD PAINT COLORS

Weather protection, water-based paints. High-performance and environmentally friendly.

PLEASE NOTE: The colors shown in the catalogue and website may not 100% match the color you will receive. The color of the wood material affects the final color.

PAINTING

AUTOMATIC MACHINE SPRAY TECHNOLOGYBenefits

One of the main and most obvious benefits of using a paint machine is the speed and flexibility at which we can suggest our painting service for all of our products. A spray paint machine can get the work done faster and more consistently than manually painting. While the machine works faster, it improves quality too – sprayers produce an even coat of paint, leaving a high-quality finish.

With our painting service from now, we can suggest to our client maximum flexibility! Not assembled products such as Grill cabins, Pavilions, Camping pods, and other products of any size you can order painted too!

PROFESSIONAL SPRAY

The high-quality preservative finish is professionally spray applied in the factory to three sides of the wood. The product is treated in your choice of color. You can choose two colors for one product: one for almost all product details and another for finishing details.

STAIN | PAINTWhich type of paint should I Use?

Properly painting and impregnating is one of the most important things to consider when thinking about how to extend your product's lifetime.
Paint and natural wood finish instantly spruce up the aesthetics of your product.
The decision you will need to make is if you want to use a water-based wood stain or paint. Both will offer you UV protection. The wood stains will allow the texture of the wood to show through and many are now available in a vast range of colors, however, paints will give you an intensive color, but will cover the grain and texture of the wood.

USAGE AND MAINTENANCE

USING YOUR SAUNA PREPARING YOUR SAUNA FOR USE.

- If you have wood burning heater, make sure to remove the protective film of the heater chimney before heating.
- Check the Sauna before heating. No flammable objects must be left on or near the heater.
- Check that there is water in the water tank (if you are using it).
- Ensure that the Sauna door is unlocked and easy to open before using it. If necessary, sauna door must be adjusted by the customer.
- Do not mount any additional accessories or shelves above the heater.
- Turn the Sauna heater on.
- The thermometer should be located at head level in the Sauna. It should be further away from the heater, so it does not give a false reading.
- Wait for the Sauna to reach the required temperature (normally 80-90° C).

All users should be aware of the potential dangers and requirements prior to participation in the Sauna!

THINGS TO NOTE WHEN USING THE SAUNA

Enjoy the many health benefits of the relaxing heat of your Sauna. But remember: being inside the hot Sauna for long periods of time raises your body temperature, which may be dangerous, especially for those with a heart condition or other health risks. **Generally, the recommended time inside a Sauna is from 10 to 15 minutes.** After a period of heating, take a **5 minute break** and then repeat. Also:

- Familiarize yourself with the safety instructions and keep away from the heater when it is hot.
- Be very careful when moving in the Sauna, as the benches and floors may be slippery!
- The Sauna should not be used by pregnant women or very young children.
- Remove all jewelry before entering the hot Sauna.

MAINTENANCE

Wood is a natural material and can change through time. Cracks of various sizes, structural or color changes are not the defects – rather, they are features of the wood. Natural wood (not impregnated) becomes grayish after being left untouched for a while. Later it can turn blue and get covered with mold.

- Impregnate and paint the wood to protect the product from outside. We recommend to inspect Sauna every 6 month and evaluate need of re-impregnation, re-painintg.
- When not in use, keep a bucket full of water in the Sauna during summer.
- · Doors of the Sauna must be adjusted regulary.
- You should keep the sauna ventilation open all the time, to allow it time to dry and air out to avoid mold.
- To remove bench stains, use a mild soapy water and a soft cotton cloth. This can also be used on the heater itself just make sure it's off and completely cool when you clean it.
- Don't use harsh or abrasive chemicals on benches, as these can bleach and warp the wood, ruining the grain and turning it grey.

With these simple maintenance tips your Sauna will stay inviting, fresh, and enjoyable!
