

COMMUNITY BARREL Ø2.2 X 4.4

PRODUCT DESCRIPTION

With this product you can gather all family or friends in one place and not be afraid of bad weather. Imagine rainy day with your friends in Community Barrel playing board games or just catching up with each other!

Community Barrel made from spruce. Thickness of the barrel walls is 38 mm; thickness of the solid wood flooring is 28 mm. Community barrel is 2.2 m wide and 2.4 m high. The roof is covered with bitumen shingles of selected color: black, red or green.

There is one 9 m² room in the barrel. Table (two parts) and two benches are included in the standard set, so you will get the barrel fully ready for use. Two entrances allow a comfortable access to the barrel. One door is mounted on the front wall and the other on the back wall. From each side of the door there is one opening vertical window. A large amount of light falls through the large windows in the door.

We use bitumen coating for roofing. 6 layer bitumen tiles consists of durable and highly resistant fiber glass base coated with polymer reinforced bitumen mix made of high quality bitumen and aggregate. The top layer of tiles is surfaced with mineral granules that lend color to the tiles and ensure high UV protection and other weather conditions resistance qualities. The granules are painted in high temperature using thermal method pigment being burned-in into the surface of granules what guarantees long durability of the color. The bottom of tiles is coated with adhesive polymer-reinforced bitumen layer protected with easily removed silicon membrane.

SPECIFICATION

People	12-15 persons
Timber	Spruce
Shape	Round
Room	1
Inside area	9.0 m ²
Diameter	2200 mm
Total height	2393 mm
Floor thickness	28 mm
Roof thickness	38 mm
Wall thickness	38 mm
External dimension	Ø2335 x 4460 mm
Door size	690 x 1800 mm
Window size	375 x 672 mm

STANDARD SET

Barrel made from spruce;
Roof covered with bitumen shingles of your selected color;
4 stainless steel tightening bands;
Four opening windows;
Two entrances - 2 doors with a lock and a big window;
One rooms inside with two benches and big table (from laminated plywood).

DELIVERY

Assembling time	8 hours
Size of pallets (LxWxH)	Not assembled - 4.5 x 1.2 x 1.3 m and assembled - 4.5 x 2.32 x 2.4 m
Weight	1200 kg

The Community Barrel is delivered to a customer **fully assembled** or **not-assembled**, but fully complete, with detailed assembly instructions and drawings, and packed on a pallet (KIT).

FOUNDATION

It is very important to have a proper base for your Barrel. Therefore, we recommend following our sketches and consulting a qualified local builder or engineer. Making sure that the base for your product fits the location is of utmost importance.

Due to an improper base, the structure may crack. If the product is unevenly seated, the geometric shape of the building may change, which can result in the door/windows twisting, and/or gaps. In the worst-case scenario, the product may even collapse.

- Before building the base, make sure you take into account the landscape and the ground conditions on which the product will stand.
- The base under the product must be prepared specifically for the product.
- The base must be homogeneous, tight and level.
- Make sure that the properties of the base do not change over time. We recommend making the base out of concrete and water-proofing it before installation.

If you do not follow recommendations for building the base, the product will lose its warranty!

PAINTING

AUTOMATIC MACHINE SPRAY TECHNOLOGY

Benefits

One of the main and most obvious benefits of using a paint machine is the speed and flexibility at which we can suggest our painting service for all of our products. A spray paint machine can get the work done faster and more consistently than manually painting. While the machine works faster, it improves quality too – sprayers produce an even coat of paint, leaving a high-quality finish. With our painting service from now, we can suggest to our client maximum flexibility! Not assembled products such as Grill cabins, Pavilions, Camping pods, and other products of any size you can order painted too!

PROFESSIONAL SPRAY

The high-quality preservative finish is professionally spray applied in the factory to three sides of the wood. The product is treated in your choice of color. You can choose two colors for one product: one for almost all product details and another for finishing details.

STAIN | PAINT

Which type of paint should I Use?

Properly painting and impregnating is one of the most important things to consider when thinking about how to extend your product's lifetime. Paint and natural wood finish instantly spruce up the aesthetics of your product. The decision you will need to make is if you want to use a water-based wood stain or paint. Both will offer you UV protection. The wood stains will allow the texture of the wood to show through and many are now available in a vast range of colors, however, paints will give you an intensive color, but will cover the grain and texture of the wood.

USAGE AND MAINTENANCE

Things to note when using the product:

- Products that are used for staying overnight should be equipped with a smoke alarm and an extinguisher;
- The product owner is responsible for the security and should work out a rescue plan for the camping site;
- Remember that using heating appliances or temporary camping stoves isn't just a fire risk, but a risk of carbon monoxide poisoning as well.

MAINTENANCE. You should not forget that wood is a natural material, it changes move depending on weather conditions. Large and small cracks, color tone differences and changes, as well as a changing structure of wood are not errors, but a result of wood growing and a feature of wood as a natural material. Natural wood (not impregnated) becomes greyish after having been left untouched for a while and can be turned blue and become mouldy. You should immediately process them with wood impregnations to protect the wooden details of our produced products.

- Like any our product, our produced furniture's needs to be looked after and processed with a wood impregnation agent or painted if you want it to last for years. Regular cleaning of your furniture is necessary to prevent mould. General warm soapy water is enough if done regularly;
- If necessary, outside doors must be adjusted by the customer;
- If you do not use your Camping Product often we highly recommend to use the installation of our vent to stop condensation;
- If you find a sap pocket open during the life of your Product - you can allow it to dry naturally and then cut the sap off with a blade.
