

HALF POD - MODULAR DESIGN

PRODUCT DESCRIPTION

[Take a look at this product video>>>](#)

In today's market, leisure products come in many shapes and sizes. We aim to provide our customers with a product to suit their needs today, complete with beds, cabinets, bathroom spaces, a sauna room, or simply ready for use in the backyard, office, or campsite.

Inspired by you produced by Viking!

With Half Pod's modular design, you can create a completely customized product to suit your needs and budget!

Modular design Half Pod is made up of 2 customized Half Pods that are joined together.

Just look at the product advantages:

- **Each Half Pod (left/right pod) is available in different layouts.** Create a unique product by joining two products. The left and right side Half Pods can be of different layouts: with or without a terrace, with one or two rooms inside. Pods can be empty or with a sauna room inside.
- **5 different sizes. Available to order from these sizes:** Half Pod 2.4 x 2.4 m; Half Pod 2.4 x 3 m; Half Pod 2.4 x 4 m; Half Pod 2.4 x 4.8 m; Half Pod 2.4 x 5.9 m.
- **Left/Right pod, front and back walls modifications.** The choice of three different types and sizes of windows (small or big opening window, and tempered glass windows for sauna room. Available to choose a door from the standard wooden, door with a big window and tempered glass door for the sauna room. Front and back walls must be specified separately for each Half Pod.
- **Connection alignment.** Half Pods are connected only through the side wall. They can be connected by aligning them at any point, just note that if you choose to install an internal door between the products leave enough space for the door.
- **Exterior painting.** Body and Finishing parts Color. Select the desired colors from the list of more than 25 different wood stains and paint colors.

Each of our Half Pod interiors can be completed with the following accessories such as different types and sizes of cabinets, double or single beds, tables, poufs, etc. For Half Sauna Pods you can order a wood-burning or electric heater, headrest, sauna light, thermometer - hydrometer, buckets, and many more.

PAINTING

AUTOMATIC MACHINE SPRAY TECHNOLOGY

Benefits

One of the main and most obvious benefits of using a paint machine is the speed and flexibility at which we can suggest our painting service for all of our products. A spray paint machine can get the work done faster and more consistently than manually painting. While the machine works faster, it improves quality too – sprayers produce an even coat of paint, leaving a high-quality finish. With our painting service from now, we can suggest to our client maximum flexibility! Not assembled products such as Grill cabins, Pavilions, Camping pods, and other products of any size you can order painted too!

PROFESSIONAL SPRAY

The high-quality preservative finish is professionally spray applied in the factory to three sides of the wood. The product is treated in your choice of color. You can choose two colors for one product: one for almost all product details and another for finishing details.

STAIN | PAINT

Which type of paint should I Use?

Properly painting and impregnating is one of the most important things to consider when thinking about how to extend your product's lifetime. Paint and natural wood finish instantly spruce up the aesthetics of your product. The decision you will need to make is if you want to use a water-based wood stain or paint. Both will offer you UV protection. The wood stains will allow the texture of the wood to show through and many are now available in a vast range of colors, however, paints will give you an intensive color, but will cover the grain and texture of the wood.

USAGE AND MAINTENANCE

Things to note when using the product:

- Products that are used for staying overnight should be equipped with a smoke alarm and an extinguisher;
- The product owner is responsible for the security and should work out a rescue plan for the camping site;
- Remember that using heating appliances or temporary camping stoves isn't just a fire risk, but a risk of carbon monoxide poisoning as well.

MAINTENANCE. You should not forget that wood is a natural material, it changes move depending on weather conditions. Large and small cracks, color tone differences and changes, as well as a changing structure of wood are not errors, but a result of wood growing and a feature of wood as a natural material. Natural wood (not impregnated) becomes greyish after having been left untouched for a while and can be turned blue and become mouldy. You should immediately process them with wood impregnations to protect the wooden details of our produced products.

- Like any our product, our produced furniture's needs to be looked after and processed with a wood impregnation agent or painted if you want it to last for years. Regular cleaning of your furniture is necessary to prevent mould. General warm soapy water is enough if done regularly;
- If necessary, outside doors must be adjusted by the customer;
- If you do not use your Camping Product often we highly recommend to use the installation of our vent to stop condensation;
- If you find a sap pocket open during the life of your Product - you can allow it to dry naturally and then cut the sap off with a blade.
