

OUTDOOR KITCHEN 2.5 X 1.6 M

PRODUCT DESCRIPTION

Outdoor Kitchen. A modular outdoor kitchen for cooking outdoors.

Many of us appreciate being outdoors, so cooking outdoors is one way to maximize our time in the garden. Whether cooking for family, friends, your partner, or yourself, cooking outdoors can help you relax and enjoy your time.

You don't need to live in a mansion to have an outdoor kitchen. All you need is a - backyard!

Our outdoor, backyard kitchen or even you can name it shelter, differs from traditional kitchens because it is modular and you can buy just what you need. Look at the selections below, which range from a simple spice rack to cabinets with LED lighting.

Standard:

A free-standing modular outdoor kitchen frame, from an anthracite-colored steel (S275). The bottom is covered with a spruce wood wall 910 mm high.

Options:

- **Sunscreen wall segment.** Wall panel dimensions are 445 x 1250 mm. The horizontal wall consists of 18 mm thickness boards.
- **Wide sunscreen wall segment.** Wall panel dimensions are 926 x 1250 mm. The horizontal wall consists of 18 mm thickness boards.
- **Wall-shelf segment for spices and herbs (from steel).** Shelf size: 445 x 1250 mm.
- **LED lighting.** Create coziness by adding warm white LED lighting to the ceiling (on the roof sides) and cabinets (under the worktops).
- **Side wall cabinet.** 1-closed wall and open shelves cabinet of size: 870 x 600 x h910 mm, with 10 mm thickness compact HPL worktop;
- **Back wall cabinet.** Open shelves cabinet of size: 1190 x 600 x h910 mm, with 10 mm thickness compact HPL worktop;
- **PVC cover set.** Suitable for an outdoor kitchen. It consists of 4 parts, for all wall protection.

USAGE AND MAINTENANCE

Things to note when using the product:

- Products which are used for staying overnight should be equipped with a smoke alarm and a extinguisher;
- Product owner is responsible for the security and should work out a rescue plan for the camping site;
- Remember that using heating appliances or temporary camping stoves this isn't just a fire risk, but a risk of carbon monoxide poisoning as well.

MAINTENANCE. You should not forget that wood is a natural material, it changes move depending on weather conditions. Large and small cracks, color tone differences and changes, as well as a changing structure of wood are not errors, but a result of wood growing and a feature of wood as a natural material. Natural wood (not impregnated) becomes grayish after having been left untouched for a while and can be turn blue and become moldy. You should immediately process them with wood impregnations to protect the wooden details of our produced products.

- Like any our product, our produced furniture's needs to be looked after and processed with a wood impregnation agent or painted if you want it to last for years. Regular cleaning of your furniture is necessary to prevent mold. General warm soapy water is enough if done regularly;
- If necessary, outside doors must be adjusted by the customer;
- If you do not use your Camping Product often we highly recommend to use the installation of our vent to stop condensation;
- If you find a sap pocket open during the life of your Product - you can allow it to dry naturally and then cut the sap off with a blade.
